

## TEAMS FROM THE USA

- ◆ Teams from the USA, *with funding*, are wanted for building churches.
- ◆ 6-8 men per team. Because this type of construction requires lifting steel, women are not recommended.
- ◆ Skills: One or two construction-savvy men are needed, the remaining team members simply need to be able and willing to work hard.
- ◆ Minimum age recommended is 15 years old.
  - No more than one or two minors per team.

## CHURCH CONSTRUCTION PLAN

- ◆ The foundation will be poured by the local congregation. They will also be responsible for the walls and the interior of the church.
- ◆ Teams from the USA will be used to put up the posts, trusses, and roof, which should be accomplished in just a few days.

## TEAM FINANCES

- ◆ A church can be built for around \$7,500.00.
- ◆ Round-trip airfare to and from the Philippines.
- ◆ Domestic airfare from Manila to the airport nearest the construction site.
- ◆ On-site costs for transportation, food, and lodging.
- ◆ There may be additional ministry available, depending on the ministry priorities of the host missionary. If so, additional costs would be necessary.
- ◆ *Because of varying economic factors involved, all of the prices are subject to change (but hopefully with notice).*
